Material Variances Symbol Above Budget Expectations Below Budget Expectations

Greater than 10% and \$5,000 Less than 10% and \$5,000

\*

### FOR THE PERIOD 1 JULY 2018 TO 31 MARCH 2019 Seport on Significant variances Greater than 10% and \$5.00

### Purpose

The purpose of the Monthly Variance Report is to highlight circumstances where there is a major variance from the YTD Monthly Budget and YTD Actual figures. These variances can occur because of a change in timing of the activity, circumstances change (e.g. a grants were budgeted for but was not received) or changes to the original budget projections. The Report is designed to highlight these issues and explain the reason for the variance.

REPORTABLE OPERATING REVENUE VARIATIONS	Ĩ	
Governance - variance below budget expectations	8	(6,772)
Admin Reimbursements and rebates yet to be received as per budget forecast (Timing Difference)	(6,017)	1.2
General Purpose Funding - variance below budget expectations  Movement in Excess Rates - YTD Budget nil compared to YTD Actual (Permanent Difference) EOY adj	(44 926)	(69,028)
Interest on investment done quarterly and yet to be raised (Timing Difference)	(44,826) (18,200)	
Law Order and Public Safety - variance above budget expectations	(,=)	40,020
ESL SES grants - YTD Higher than budgeted (Timing difference) received early Q1 Instal in June 17/18	8,060	
ESL BFB grants - YTD Higher than budgeted (Timing difference) received early Q1 Instal in June 17/18	14,974	
Bring to Account DFES Appliance Grant for GST	19,546

All land except exempt land in the Shire of Pingelly is rated according to its Gross Rental Value (GRV) in townsites or Unimproved Value (UV) in the remainder of the Shire.

to meet the deficiency between the total estimated expenditure proposed in the budget and the estimated revenue to be received from all sources The general rates detailed above for the 2018/19 financial year have been determined by Council on the basis of raising the revenue required other than rates and also bearing considering the extent of any increase in rating over the level adopted in the previous year. The minimum rates have been determined by Council on the basis that all ratepayers must make a reasonable contribution to the cost of the Local Government services/facilities.

### NOTES TO AND FORMING PART OF THE STATEMENT OF FINANCIAL ACTIVITY

### FOR THE PERIOD 1 JULY 2018 TO 31 MARCH 2019

### 10. FINANCIAL RATIOS

	2019 YTD	2018	2017	2016
Current Ratio Operating Surplus Ratio	0.60 (0.49)	4.05 (0.26)	2.03	1.05 (0.72)

The above ratios are calculated as follows:

### **Current Ratio**

(Current Assets MINUS Restricted Assets)
(Current Liabilities MINUS Liabilities Associated with Restricted Assets)

### Purpose:

This is a modified commercial ratio designed to focus on the liquidity position of a local government that has arisen from past year's transactions.

### Standards:

The standard is not met if the ratio is lower than 1:1 (less than 100%) The standard is met if the ratio is greater than 1:1 (100% or greater)

Below Std Std met

A ratio less than 1:1 means that a local government does not have

sufficient assets that can be quickly converted into cash to meet its immediate cash commitments. This may arise from a budget deficit from the past year, a Council decision to operate an overdraft or a decision to fund leave entitlements from next year's revenues.

### Operating Surplus Ratio

(Operating Revenue MINUS Operating Expense)
(Own Source Operating Revenue)

### Purpose:

This ratio is a measure of a local government's ability to cover its operational costs and have revenues available for capital funding or other purposes.

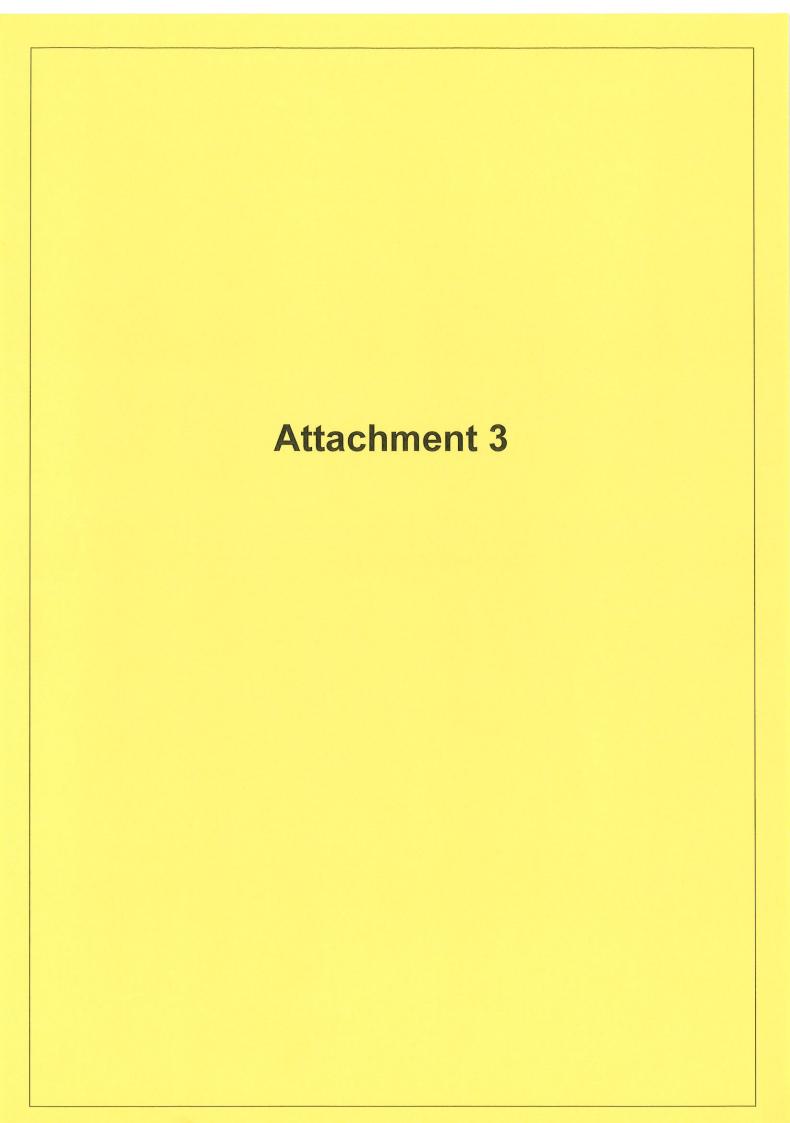

### Standards:

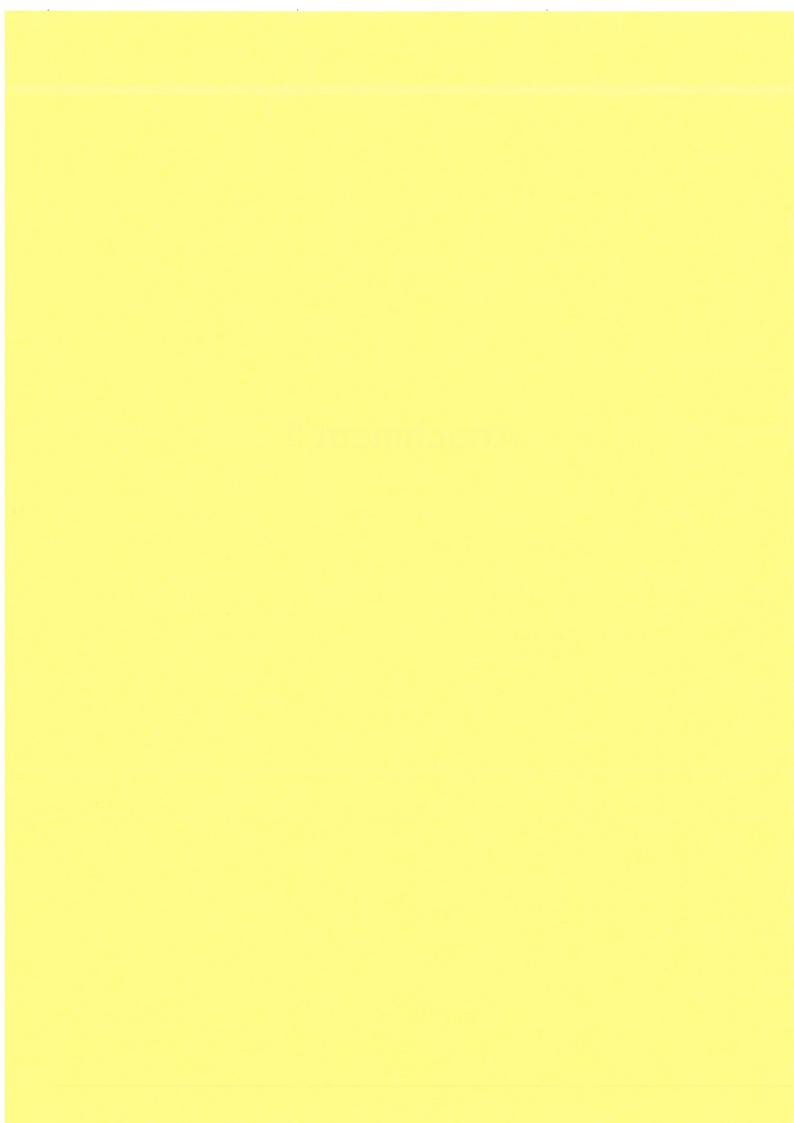

Basic Standard is not met less than < 1% (< 0.01) Basic Standard between 1% and 15% (0.01 and 0.15) Advanced Standard greater than > 15% (>0.15).

	4.3	Fulfilment of approvals	7

### **Background notes**

- I. This policy sets out the general principles, which will be used by the Western Australian Planning Commission (WAPC) in determining applications for the subdivision of land. It indicates the WAPC's basic requirements for the creation of new lots as well as the procedures it will follow in processing subdivision applications.
- 2. The context to this policy is provided by Statement of Planning Policy No. 1 State Planning Framework, the State Planning Strategy and the principles for sustainable land use and development contained in the State Sustainability Strategy released in September 2003.
- 3. The policy is complemented by other policies which are concerned with the more detailed aspects of lot creation for particular land uses. The general principles should be read together with the relevant use-specific policy to give a comprehensive coverage of the WAPC's policy requirements for any particular use.
- 4. The policy was originally adopted by the WAPC in July 1988. The policy was updated in May 1998, to include the WAPC's policy on "superlot" subdivision of land holdings and further updated in June 2004, to reflect refinements and revisions to other WAPC policies.

### I. Introduction

- This policy is primarily concerned with those 1.1 matters contained in Part III of the Town Planning and Development Act 1928 and the Town Planning and Development (Subdivision) Regulations 2000, which deal with the subdivision of land alienated from the Crown. The policy sets out the general principles which will guide the WAPC in determining applications for subdivision. For the purpose of the policy, subdivision includes the creation of a new lot or lots, the amalgamation of existing lots, and any other dealings in land which require the approval of the WAPC and includes the creation of green title, strata and survey strata lots.
- 1.2 In its determination of applications the WAPC will seek to ensure that the broad objectives contained in section 2 of this policy are met. If the objectives cannot be complied with then the applications will not be approved. The WAPC may, however, impose conditions on an approval to secure its objectives.

### 2. Policy objectives

- To control the subdivision of land within the framework of the relevant legislation and regulations.
- To ensure that the subdivision of land is consistent with Statement of Planning Policy No. 1 State Planning Framework (SPP No. 1) and relevant WAPC policies and plans.
- To ensure that all lots created have regard to the provisions of the relevant local government town planning scheme.
- To ensure a comprehensive and coordinated approach to the subdivision of urban expansion areas in metropolitan Perth, regional centres and country towns.
- To ensure the subdivision pattern is responsive to the characteristics of the site and the local planning context.
- To ensure that the subdivision is consistent with orderly and proper planning and the character of the area.
- To facilitate development which achieves appropriate community standards of health, safety and amenity.

- To facilitate appropriate access and movement systems for all modes of transport.
- To ensure constructed vehicle access from the gazetted public road system to each new lot.
- To create lots that are capable of lawful development and, at the same time, ensure that existing lots or the development upon them is not rendered illegal.
- To secure public utility services to each new lot appropriate for intended use of the lot.
- To make appropriate arrangements for development contributions, where necessary and relevant, for the orderly and proper planning of the locality containing the subdivision.
- To make appropriate arrangements, where necessary for planning purposes, for the ceding or transfer of land.

### 3. Policy measures

### 3.1 Consistency with long-term planning goals

3.1.1 SPP No. 1 sets out the general principles for planning and brings together the WAPC's statements of planning policy, regional strategies, regional and sub-regional structure plans and operational policies into a single policy framework. SPP No. 1 together with any applicable region scheme and the relevant local government town planning scheme, including any local planning strategy (pursuant to the Model Scheme Text as set out in the Town Planning Amendment Regulations 1999), provide the planning policy direction which guides the WAPC in determining subdivision applications. These provisions will not only reflect the broader, long-term land use proposals for an area but also contain a level of land use detail and carry sufficient statutory acceptance to support a decision on subdivision.

### 3.2 Context and site analysis

3.2.1 Subdivision applications should be submitted with such detail as is necessary to enable the WAPC to make a determination on the application. Form 1A Application to Western Australian Planning Commission for Approval

- of Plan of Subdivision, Amalgamation or Survey Strata, sets out the information required to accompany a subdivision and survey strata application.
- 3.2.2 For larger scale subdivisions, for example, major urban expansion areas or new industrial subdivisions, a more detailed context and site analysis may be necessary.
- 3.2.3 The purpose of a context analysis is to ensure that new subdivision and development is connected to and integrated with surrounding natural and developed areas, including planned and committed development for adjacent sites. The context analysis also identifies key opportunities and constraints presented by the context of the site.
- 3.2.4 The WAPC will require sufficiently detailed assessment of the site and its immediate surrounds, in accordance with the relevant policies of the WAPC, demonstrating:
  - a sustainable and environmentally site responsive design;
  - the creation of a positive sense of place and identity based upon natural and cultural assets; and
  - compatible integration of interfaces between the development site and neighbouring land use and development.

### 3.3 Structure plans

- 3.3.1 Structure planning is a process of developing a framework for the integrated subdivision and development of a major residential, commercial or industrial area, or activity centre. Structure plans are particularly useful for co-ordinating subdivision and development in areas of fragmented ownership. They have also been known as outline development plans and comprehensive development plans.
- 3.3.2 District scale and local scale structure plans may be required under the provisions of a local government scheme or may be prepared as a non-statutory plan. Where a structure plan is a requirement of a local government scheme, it must be prepared in accordance with the scheme provisions and have regard to the provisions of any regional or sub-regional structure plan. The WAPC has adopted model provisions for the approval and adoption of structure plans under local government schemes.

- 3.3.3 Structure plans may also be accompanied by cost-sharing arrangements between landowners for the provision of common infrastructure. The WAPC has an adopted policy on the scope of developer contributions and has also adopted model provisions for developer contributions.
- 3.3.4 The WAPC will have regard to any adopted structure plan and developer contribution arrangement when considering subdivision applications submitted within an area covered by the structure plan or developer contribution arrangement.

### 3.4 "Superlot" subdivisions

- 3.4.1 There is a presumption against "superlot" subdivision of land holdings which are identified or zoned for future urban purposes and which are already of a size suitable for that purpose (i.e. generally less than 150 hectares) where this could prejudice the orderly and proper planning of the land.
- 3.4.2 However, where it can be demonstrated that a superlot subdivision of a large land holding will not be contrary to the orderly and proper planning of the land, a superlot subdivision may be supported subject to:
  - (1) The land being zoned "Urban", "Industrial" or "Central City Area" in the Metropolitan Region Scheme or regional planning scheme and appropriately zoned in the local government town planning scheme.
  - (2) The original land holding being given subdivision approval for at least the first stage of development and actual development having commenced.
  - (3) The preparation of a comprehensive local structure plan in liaison with the local government and to the satisfaction of the WAPC. The structure plan shall be accompanied by a report, which clearly indicates the development contributions, capabilities and obligations of each superlot.
  - (4) Development contributions, capabilities and obligations referred to in (3) being the subject of a record on title pursuant to section 70A of the Transfer of Land Act 1993, or a legal agreement with the WAPC and/or any other relevant public authority which shall be binding on subsequent owners and supported by caveats lodged by the WAPC to ensure that prospective purchasers are aware of the commitments.

- 3.4.3 Depending on the degree of need to maintain flexibility in the planning of the original land holding, the WAPC may approve the excision of only one superlot to incorporate the first stage(s) of development, or up to a maximum of the subdivision of the whole of the land holding into superlots where arrangements regarding infrastructure have been established. The minimum size of superlots should be 20 hectares.
- 3.4.4 Where development contributions can be conveniently made at the time of a superlot subdivision, the WAPC will require that these be ceded as conditions of subdivision, to be either transferred to the Crown at that time, or to be the subject of a separate legal agreement which ensures the transfer of a site at some future nominated time.

### 3.5 Lawful development

- 3.5.1 Local government town planning schemes usually incorporate standards governing the development of lots, most commonly through lot size minima for different uses. Also relevant, however, will be minimum frontage requirements, the need to meet setback requirements, compliance with open space provisions etc. In areas not subject to an operational scheme, similar requirements may be contained in local laws made under the Local Government Act 1995. For residential development, the Residential Design Codes provide guidance on the minimum and average lot sizes which the WAPC will have regard to.
- 3.5.2 Lots which cannot be developed in accordance with relevant statutory requirements will not be approved. The WAPC will also ensure that, by creating a new lot, it does not render an existing lot or development upon that lot illegal in terms of statutory requirements. Such matters may include lot sizes, car parking, setbacks or the provision of services.

### 3.6 Public utility services

3.6.1 The WAPC will ensure that each new lot is provided with a standard of public utility services, or that provided by a licensed private service provider, appropriate for its intended use. The level of such services will be determined by the WAPC in the light of the intended use, the size of the lot, soil conditions, the provisions of the town planning scheme and the Government Sewerage Policy - Perth Metropolitan Region and the Country Sewerage Policy, together with the provisions of any other published policy that may be relevant.

- 3.6.2 Subdivision is often proposed for land across which there is an existing public utility easement or facility (such as high voltage electricity transmission and distribution lines, natural gas pipelines, gas distribution systems and the major water and sewerage mains). In such instances the subdivider should negotiate with the service agency concerned before lodging an application with the WAPC and, if possible, reach agreement on both:
  - the surrender of the existing easements;
  - the way in which the particular facility will be protected and/or relocated upon subdivision.

A letter from the agency confirming the arrangements should be supplied with the subdivision application. Where this is not supplied by the applicant, the WAPC will normally impose a condition requiring certification from the servicing agency concerned that both the surrender of existing easements and protection of the facility will be undertaken to the satisfaction of the agency. This condition will normally be imposed unless the WAPC is satisfied that the requirement of the servicing agency is unreasonable.

- 3.6.3 It has been determined from the Department of Land Information that services placed in pedestrian access ways and rights-of-way cannot be formally protected by virtue of the operation of section 167A of the *Transfer of Land Act 1993*. To afford that protection in future, the WAPC will impose a condition on each diagram or plan of survey on which one or more right-of-way or pedestrian access way are shown to state that:
  - "The applicant is advised that any diagram or plan of survey showing a pedestrian access way(s)/right(s)-of-way should carry the following inscription:

Pedestrian access way(s)/right(s)-of-way shown on this plan/diagram to vest in the Crown under section 20A of the *Town*Planning and Development Act 1928 and the provisions of section 167A of the *Transfer of Land Act 1993* shall not apply."

### 3.7 Vehicular access

- 3.7.1 New green title lots will be created only where each lot has, or can be, provided with direct frontage access to a constructed public road, which is connected to the road system of the locality. This is to ensure the provision of public utility and other services as well as to provide vehicular and pedestrian access to the lot.
- 3.7.2 Where new roads are needed, the subdivider will be required to dedicate, construct and drain these roads to the specifications and satisfaction of the WAPC on the advice of the local government. The WAPC may also require existing roads or rights-of way to be widened, constructed, upgraded or dedicated to ensure compliance with this policy.

### 3.8 Suitability for development

- 3.8.1 The WAPC considers that all new lots should be physically capable of development for their intended purpose. Prospective purchasers of such lots should be reasonably assured that the lot is suitable in physical terms for development, and that there is a degree of assurance that the lot will so remain.
- 3.8.2 To this end, the WAPC may require such action as the land being filled and drained, connection to an external system of drainage or construction of a driveway, before the lot is created.

### 3.9 Developer contributions

3.9.1 The WAPC may impose conditions requiring developer contributions (including the ceding of land) for the provision of infrastructure and services which are necessary and relevant to the subdivision.

These contributions may be in the form of:

- ceding of land for roads, public open space, primary school sites, drainage and other public works;
- construction of infrastructure works which are transferred to public authorities on completion;
- monetary contributions to acquire land or undertake works by public authorities or others.

The scope and arrangements for developer contributions are set out in WAPC policies.

### 3.10 Other policy requirements

3.10.1 The WAPC's Development Control (including subdivision) Policy Manual includes other operational policies dealing with the subdivision of land into lots for specific land uses. The policies contain the requirements of the WAPC and should be read together with this policy.

### Implementation of policy

### 4.1 Procedures

4.1.1 Applications for the subdivision of land to the WAPC should be made on the appropriate form and include such information as is required, having regard to the scale and content of the proposal. As required by the relevant legislation, the WAPC will forward a copy of each application to any local government, public body or government department whose powers or functions may be affected for objections and recommendations. These matters will be considered by the WAPC in making a decision on the application.

### 4.2 Appeals

4.2.1 Under the relevant legislation there is a right of appeal against the decision of the WAPC. Appeals can be made to the Town Planning Appeal Tribunal within the periods prescribed by the legislation.

### 4.3 Fulfilment of approvals

4.3.1 Following an approval being granted, the applicant should make arrangements in liaison with relevant government agencies, local government and the utility providers, with regard to the fulfilment of conditions. The WAPC must be satisfied in this regard that all conditions have been fulfilled, including the construction of subdivision works, arrangements for the ceding or transfer of any land to the Crown and other subdivision requirements. When the WAPC is satisfied, it will endorse the diagram of survey, prior to the issue of titles by the Registrar of Titles.

### 1 PROPOSAL

This report forms part of the application for the proposed boundary realignment subdivision of Lots 6358, 7394, 7485 and 7484 (referred to within as 'the property').

The purpose of this report is to present the justification for the boundary realignment as proposed and to assist decision-makers and service authorities to consider this application.

The boundary realignment proposal aims to achieve a number of outcomes:

- 1. One new title combining part Lot 6358 (32.1ha) and part Lot 7394 (85.2ha) to a total of 117.3ha along the northern side of Bullaring Road;
- 2. A second title part being the balance of Lot 6358 to the south (170.2ha);
- 3. The third title, being part Lot 7394 (52.3ha) and part Lot 7485 (52.2ha) to a total of 104.5ha;
- 4. Finally, a fourth title joining part Lot 7485 (9.6ha) with Lot 7484 (59.6ha).

The boundary realignment is shown on the attached **Plan of Subdivision** (Drawing 21823-01) and the proposal is outlined in more detail below.

### 2 BACKGROUND & SITE CONTEXT

### 2.1 Land Details

All four lots are in the same ownership with the details of the current landholdings included in the table below.

Lot	Certificate of Title	Ownership
Lot 6358	Volume 900, Folio 168	Noelbri Farm Holdings Pty Ltd
Lot 7394	Volume 1272, Folio 169	Noelbri Farm Holdings Pty Ltd
Lot 7485	Volume 1272, Folio 169	Noelbri Farm Holdings Pty Ltd
Lot 7484	Volume 1126, Folio 431	Macnamara Oldfields Homestead Pty Ltd

### 2.2 Zoning

The property is currently zoned 'General Agriculture' by Shire of Pingelly's Local Planning Scheme No. 3.

### 2.3 Location

The property is located approximately 37km east of the Pingelly townsite.

### 2.4 Surrounding Land Use

The property is situated in a rural area with all adjoining land being similarly zoned 'General Agriculture'. The surrounding landuses are all for the purposes of board acre farming typically found within the general agricultural zone.

### 2.5 Topography

The topography of each lot is demonstrated on the attached Plan of Subdivision attached at **APPENDIX B**. Generally, the land slopes towards the creek lines located central to proposed Lots B and C and the northern portion of proposed Lot A, with flow typically in a north eastern direction.

#### 2.6 Vegetation

No remnant vegetation of a riparian quality is proposed to be altered as part of this boundary rationalisation. The proposed boundaries respect vegetation lines and allow for the majority of the cleared, functioning farmland to remain for the purpose of board acre cropping.

### 2.7 Existing Buildings & Structures

All existing dwellings (1 dwelling) and structures (5 outbuildings) onsite are to be retained as part of this subdivision as shown on the attached Plan of subdivision at **APPENDIX B**.

#### 3 SERVICING

The proposal is for the existing four lots to be modified. No additional lots are proposed. The subdivision proposal aims to achieve the following main outcomes:

- Re-configure the lot boundaries to better reflect the current fencing, vegetation lines and land use.
- Allow for each lot to have access to standard services inclusive of road access and power.

A power connection is in place to the existing homestead. It is therefore noted that no modifications are required in terms of the servicing of the proposed new lots. All lots exceed 50Ha in size and no additional power connections are required.

# 4 PLANNING FRAMEWORK

# 4.1 Shire of Pingelly Local Planning Scheme No.3 (LPS 3)

The property is currently zoned 'General Agriculture' by Shire of Pingelly's LPS 3. The proposed boundary realignment allows for the existing general agricultural land uses to continue.

It is noted that LPS 3 in clause 5.20.1 sets out the following matters which the Shire are to consider when assessing a subdivision application within the general agricultural zone. These include:

1. The ability of services required to support the proposed development or subdivision and the economic impact of the provision of/extension or upgrading of those services.

As detailed within this report, no additional servicing infrastructure is required to support this boundary realignment.

 The adequacy of the roads, existing or proposed in the area which may be needed to support the amount of road traffic expected to be generated by the development or subdivision.

No roads are proposed to be constructed as part of this subdivision application. Existing roads provide adequate legal road frontage for each of the proposed lots.

 The need to enforce such conditions as council deems appropriate in order to minimize any adverse effects the development or subdivision may have on the general environment of the area.

Since the subdivision seeks to keep all existing vegetation with no changes to the current landuse, it is requested that the shire support this application to be approved unconditionally.

Further, section 5.23.3 lists the criteria which the Shire Council must be satisfied to meet in order for this subdivision application to be approved. Within this clause, the Scheme allows for a boundary realignment subdivision of 'General Agricultural' zoned land where adjustment of lot boundaries is proposed for farm rationalisation purposes, and where no additional lots are created or any changes to the farming operations of the land are proposed. Therefore, the proposed subdivision application meets the requirements of the Shire of Pingelly's LPS 3.

#### 4.2 WAPC DC Policy 3.4 'Subdivision of Rural Land'

WAPC Development Control Policy 3.4 Subdivision of Rural Land and its parent State Planning Policy No.2.5 provide guidance on the subdivision of rural land. Section 6.3 of the Policy relates to boundary realignments.

The Policy allows for multiple lots in one ownership to be rationalised in order to achieve better land management or create access to landlocked lots. The proposed boundary realignment meets the requirements of the Policy in that:

- No additional lots are proposed to be created;
- The new boundaries are logical and allow for safer and improved land management; and
- No new roads are proposed to be created and the property does not front any State roads.

The proposed boundary realignment therefore meets the requirements of the WAPC DC Policy 3.4. It is also noted that WAPC DC Policy 3.4 states that,

"In instances where a subdivision only proposes to realign existing lot boundaries, where no change to the land use and/or landform is proposed, and no additional development is proposed, applications for property rationalisation may be unconditionally approved".

We request therefore that this proposed be approval unconditionally.

## 4.3 WAPC SPP 3.7 'Planning in Bushfire Prone Areas'

The subject land is located within a bushfire prone area, as designated by the Department of Fire and Emergency Commissioner. However no detailed fire assessment is required as outlined below.

Planning Bulletin 111/2016 states that State Planning Policy 3.7 applies to applications for subdivision except for amalgamations or boundary realignments. Since this proposed boundary realignment will not result in an increased bushfire risk, no detailed fire assessment is required at this stage. Any potential future development on the site will require appropriate assessment at that time.

# 4.4 WAPC DC Policy 1.1 'Subdivision of Land – General Subdivision Principles'

The subdivision as proposed meets the general subdivision principles as outlined in DC 1.1. It is noted that in particular, the subdivision meets:

- Section 3.2 as this report sets out the site context;
- · Section 3.5 as it is lawful development; and
- Section 3.7 as the proposed new lots will front constructed public roads.

### 5 CONCLUSION

The proposed boundary realignment represents a logical subdivision for the purposes of lot rationalisation and is justified on the following grounds:

- 1. The proposal is for the existing four lots to be modified. No additional lots are proposed;
- 2. The proposal new boundaries allow for safer and improved land management;
- The proposal is consistent with Shire of Pingelly's Local Planning Scheme No. 3 and WAPC Development Control Policy's 1.1 and 3.4 and SPP 3.7; and
- 4. The proposed subdivision will not result in any loss of agricultural land but will allow existing rural uses to continue.

The Commission's unconditional approval of the proposed boundary realignment is respectfully requested.
