

# FRONT FENCES

## **What Constitutes my Front Fence?**

A front fence is the fence that extends across the front boundary line of the lot and returns down the side boundaries for the same distance as the front setback for the lot. Refer to Information Sheet 5 for front setback distances.

## **When do I need Shire Approval?**

All fences that exceed 1.2m high require approval in the form of a Building Permit.

## **Provisions of the Residential Design Codes that apply to Front Fences:**

- Front walls and fences within the primary street setback shall be visually permeable 1.2m above natural ground level
- Front walls and fences are to promote surveillance and enhance streetscape, taking account of:
  - the need to provide protection from noise and headlight glare where roads are designated as primary or district distributors or integrator arterials; or
  - the need to provide screening to the front setback; or
  - the need to provide privacy to north facing outdoor living areas
- Walls and fences shall be truncated or reduced to no higher than 0.75 m within 1.5 m of where walls and fences adjoin vehicle access points and/or where a driveway meets a public street and/or where two streets intersect so that adequate sight lines are provided at vehicle access points.
- Visually permeable means: in reference to a wall, gate, door or fence that the vertical surface has:
  - continuous vertical or horizontal gaps of at least 50 mm width occupying not less than one third of its face in aggregate of the entire surface or where narrower than 50 mm, occupying at least one half of the face in aggregate, as viewed directly from the street; or
  - a surface offering equal or lesser obstruction to view.
